

2 December 2011

Dear Parent/Carer

IPC Celebration Evening on Thursday 8 December 2011 from 3:30pm – 4:00pm

Over this term your child has been working very hard in IPC - the International Primary Curriculum.

The IPC is an umbrella under which we teach the subjects of Geography, History, Art, PE, Science, ICT, Music and Technology to a theme. The children study three themes a year that also support learning in the foundation subjects of Reading, Writing and Numeracy. This gives a key focus for learning which is exciting and fun for the children.

You will have already found out about the topic being taught to your child in the class newsletter and may have seen it displayed in the classroom. We would now like to show you the results of this teaching by inviting you into your child's classroom to view their work.

We hope you will enjoy this opportunity to celebrate and share your child's work as well as find out more about how they are taught. You will be able to view photos of the children engaged in IPC activities, look at the fantastic display in the rooms and discuss the work they have produced.

This is not a parent information evening so will be very informal and focused on what your child has achieved. If you have other matters to discuss please make an appointment with your child's class teacher.

We do hope that you are able to attend with your child.

Thank you very much for your continuing support.

Yours sincerely

Joanna Chick
Assistant Principal - Curriculum
