

### **Key skills**

We demystify the process of language learning by teaching the habits of excellent linguists so that our pupils are confident, enthusiastic and lifelong linguists who will navigate the world as a global citizen.

### **Achieve academic excellence**

We provide all students with the opportunity to explore and excel in a foreign language. We believe nobody is born 'good at languages' and instead share the message that success is about practice.

### **Awe and wonder**

We teach students about the cultures of the French and Spanish speaking world in order for students to build a tolerance and awareness of communities that are different from their own. We encourage pupils to continue learning about their native language alongside English and facilitate a Community Language GCSE.

## Languages at SMA

### Our vision for the MFL curriculum

### **Innovation**

Students use online tools such as Study Mojo, Quizlet and Duolingo to support their learning. We also use new technologies to teach Mandarin with a teacher in Beijing!

### **Bring it to life**

We run extra-curricular clubs that bring the language to life, through music, dance, food and art. We also have links with schools in France and Spain to create friendships
