

In History, we aspire to make pupils passionate, inquisitive and knowledgeable about the world, to understand how it is the result of experiences, decisions and actions of people in the past, whether they are well known or not, making them active and informed citizens of the future.

We will deliver a curriculum that is **varied**, **relevant** and **engages** the pupils with history; through study of the past we want them to link to the present and their future

We aim to make pupils **active citizens** who are **critical thinkers** of the world around them and to ask questions at all times

We aim to develop a **greater awareness** of history around us by experiencing and exploring the rich history of London and the United Kingdom

## History at SMA

### Our vision for the history curriculum

Provide opportunities to understand that history is not just about famous powerful people but that we are all **active creators** of our world and can shape our communities

Pupils will be **academically successful** by providing learning that is rigorous, challenging and enables them to reach their goals
